Dear Vinay Kumar Awaar,

One of our track chairs, Seddik bacha <seddik.bacha@g2elab.inpg.fr>, has invited you to review a manuscript MD-009202 entitled Control Strategy for Dynamic Voltage Restorer Under Distorted and Unbalanced Voltage Conditions submitted to ICIT19. The reviewer entrance is located at

<http://submit.ieee-ies.org///submit-cgi-bin/reviewerlogin.pl?event=ICIT19&userid=vinaykumaar.a@gmail.com>

Please enter the password of 2829 to log in. You will see a list of manuscripts submitted to ICIT19 that track chairs kindly request you to help reviewing. There are two buttons under each item. Clicking one button starts the review process for the particular manuscript. Clicking the second button allows you to refuse the review of a particular manuscript in case you cannot help us with the review.

In case the link above was damaged by your email program or if you are afraid to click links from within your email please copy-paste or retype the following location into your Web browser:

<http://submit.ieee-ies.org///submit-cgi-bin/reviewerlogin.pl?event=ICIT19&userid=vinaykumaar.a@gmail.com>

The event code is ICIT19

Your user id is your email vinaykumaar.a@gmail.com

Your password is 2829

In order to make our decision about acceptance of the manuscript we need your review no later than within two weeks of receiving your first invitation to review this manuscript.

Please contact the track chair Seddik bacha <seddik.bacha@g2elab.inpg.fr> if you believe that you received this email as an error. Please use the refuse review feature for any manuscript that is outside of the area of your expertise. In case you cannot help us with the review please refuse the review as soon as possible so that we have enough time to ask someone else. The refuse review button can be accessed after logging in to the system. You would be asked to choose a reason from the list and confirm your refusal.

Regards,

ICIT19 Technical Track Chair, Seddik bacha <seddik.bacha@g2elab.inpg.fr>

Conference submission system support, <aagusto_ies@gmx.com>

P.S.

You will receive a separate invitation for each manuscript. The submission system might send you an automated weekly reminder listing all pending and completed reviews regardless from any arrangements made with the track chair regarding the review deadline. We apologize for the inconvenience but decided to implement the a little annoying reminder system as the reviews for conferences must be completed in a very limited period typically of two to three weeks.
